

DOKTOR DOOM FOGGER APPLICATION TIPS

READ LABEL BEFORE USE!

DOKTOR DOOM FOGGER APPLICATION TIPS

1. Use in Homeowners Greenhouses and other Indoor Growing Areas
2. Use up to 1 day before Harvest on Vegetables, Flowers and Ornamental Plants
3. One ounce Fumigates - Fogs 1000 Cubic Feet: Width x Length x Height= Cubic Feet
4. Always Fog in the Dark-do not use in direct sunlight or with HID Lights on
5. Best used 2-3 hours after the lights are off or 2-3 hours after sunset-the Greenhouse or Indoor area cools down and the bugs come out
6. Always do an under leaf treatment with Doktor Doom Spider Mite Knockout prior to Fogging

PREPARATIONS BEFORE FOGGING

1. Shut off pilot lights and open flames in the area to be fogged; this includes Furnaces, Hot Water Tanks, CO₂ Burners etc
2. Turn off Exhaust Fans, Air Conditioners and Circulation Fans
3. Close all windows and doors in the growing area
4. Turn off any automated appliances that cycle ON & OFF. This includes Timers, CO₂ Controllers etc
5. Water your Plants before application

FOGGING

1. Raise the shades in the growing area to Maximum Height
2. Prop the Foggers up on a 5 Gallon pail
3. Do not allow the mist to come in direct contact with Plants - it is designed to go up in the air and fall on the Plants
4. Depress the valve into locked position, exit the area immediately and close the door behind you
5. Re-enter the area at least 2 hours after treatment - the longer the better
6. Open all doors and windows, turn on exhaust fans, circulation fans to "Air Out" the area for at least ½ hour before commencing work in the area
